

Uknow is our new medical content and resources space within Upopolis. Content is driven by patients. This allows us to ensure that the content we are creating is relevant to the pediatric patients accessing our site! Medical information and resources can now be delivered through a variety of multi-media approaches.

Uknow video content requests

- Tour of the operating room
- Tour of IGT (Image Guided Therapy)
- How to talk to friends about my illness?
- Removing a cast
- Bloodwork
- Getting an IV (intravenous)
- CT Scan and MRI
- How to talk to your doctor and ask your questions?
- Where are the fun areas in the hospital?

Why Uknow?

Upopolis provides pediatric patients, across Canada, with a private, safe and secure network where they can communicate with friends and family, and connect with other youth across Canada in hospital. One of the most unique features of Upopolis is the availability of medical information and resources written specifically for pediatric patients. This content is created, reviewed and approved by health care professionals and child life specialists to ensure it is age appropriate and provides a fitting overview of what they may experience in hospital. Medical content on Upopolis has always been through written information that users can read and review at their own pace.

Need:

A survey of patients (aged 12-17), conducted at The Hospital for Sick Children Toronto in 2014, revealed the need for more dynamic, engaging information through the use of video.

The Uknow Program:

Our focus is the creation of “video tours” led by patients who interact with child life specialists and health care professionals: To learn about areas of the hospital and procedures in an effort to reduce anxiety, provide age appropriate information and promote a family centered approach. The pediatric patient is a part of the healthcare team and is encouraged to ask questions and be part of the discussion in their own care!

Benefits:

Uknow is a team effort, directly involving pediatric patients, doctors, child life specialists and other health care professionals. Directly involving pediatric patients in developing relevant medical content requested by them, will help promote coping skills and access to information that is interesting, fun and engaging!

The FIRST UKNOW Video:

Filmed at SickKids Hospital in Toronto, episode one of Uknow was titled "Exploring the Operating Room at SickKids". The production involved a UPOPOLIS user and patient who had been through multiple surgeries in his course of treatment. He was able to sit down with an anesthesiologist and child life specialist and ask the questions that were most important to HIM and receive answers, to questions, that will help other pediatric patients who watch the video. A tour of the operating room at SickKids normalized what is often a scary, anxiety provoking and "off-limits" area that is traditionally only seen the minute you enter the room for your surgery.

Our Plans Include:

- Video tours of hospital areas (led by a pediatric patient) that are often "off-limits" unless you are about to have a procedure or surgery
- Changing the perception of "scary areas of the hospital" to educational, interesting places where youth can learn about the procedures in an age appropriate way.
- Learning what information is important to pediatric patients and targeting common fears

EXPLORING THE OPERATING ROOM AT

SickKids

UKNOW FUNDING REQUEST:

\$5,000 per video
20 videos to be produced
over 2 years. Total: \$100,000

About Kids' Health Links Foundation

Kids' Health Links Foundation (KHLF) is a registered Canadian charity that, through the use of technology, helps young hospital patients stay connected to their family, friends and schools, and with other patients across Canada (www.upopolis.com) Upopolis was developed in partnership with TELUS. KHLF has also developed and offers online resources for front line pediatric care professions (www.upedia.ca) and child and youth mental health professionals (www.UMIND.ca), across Canada. Find out more at www.kidshealthlinks.org. UPOPOLIS®, UPEDIA®, and UMIND® are registered trade-marks of Kids' Health Links Foundation.
